New Orleans East has become an economic development desert. Our community has the potential of being a great asset to Orleans Parish if more funding and focus. New Orleans East communities are the largest base taxpayers and voters of Orleans Parish that is in need of specific economic-development priorities, promote inclusive growth in the East's marginalized neighborhoods, increase employment opportunities, and promote innovation. Our ask is to draw maps that give our community a fair chance to elect candidates of our choice in the Greater (city) area. Also, transparently share the criteria used to draw maps and giving the public ample opportunity to provide feedback before final decisions are made.
