Hello,

I wanted to share my thoughts about the upcoming redistricting sessions.

Districts should be fair and give proportional voice to minority and geographic communities of interest. I support a second minority/majority district, as does our Governor.

For State Legislative Districts, the City of New Orleans increased by 40,000 since 2010 -- which suggests there should be a new State House seat in the city.

Supreme Court Districts need to be updated to give judicial relief to those not proportionately represented. The Supreme Court is critical for achieving our goals of justice and equality for all. We really need to reapportion these districts because putting it off is unjust.

Thank you,  
Teresa Kenny
