On October 15,2020 the courts upheld #45's decision to stop the Census count. That's one reason the district's lines should not be affected. There is no way everyone in North Louisiana was counted.

Louisiana like many rural states have limited access to the internet. Promotion of the 2020 census was its easy, answer on line. Without access to a computer how would thousands be counted. When the initial census numbers were reported they were low. Teams were sent out to areas with low turnout to locate those missing people. Stopping that effort would leave many uncounted.

There is no way the census could be close to correct. District 4 & 5 have spotty internet service as is. Until there is a recount of those districts the districts lines should remain the same.

Thank you
